- CSS3
- Bootstrap
- Tailwind CSS
- JavaScript
- React JS
- Firebase

OBJECTIVE

Highly motivated and dedicated Frontend Web Developer seeking an opportunity to contribute in a dynamic environment. Eager to leverage my skills and knowledge to support the growth and success of the organization.

EDUCATION

BS | 2018 – 2022
Comsats University Islamabad, Atd Campus
- I have done my BS in Software Engineering from COMSATS Abbottabad, scoring 72% marks.

FSC | 2017 – 2018
Tameer I Wattan Public School and Colleges, Atd
- I completed FSC from Tameer I Wattan Public School and Colleges Abbottabad, scoring 75% marks.

MATRIC | 2015 – 2016
Red Roses Islamic Academy, Atd
- I did my matriculation from RED ROSES, scoring 79% marks.

EXPERIENCES

URRAAN | Frontend Web Developer

I gained valuable experience during my 2 months Frontend Web Development internship at Urraan, a CSR project by Codematics Inc. I completed 10 tasks in HTML, CSS, and JavaScript creating fully responsive designs. This hands-on experience has equipped me with practical frontend development skills.

Online Project | Therapy Nails Spa

I successfully secured my first online project through LinkedIn, where I developed the Therapy Nail Spa website. This project involved creating two key pages—Home and Pricing—utilizing HTML, CSS, and JavaScript. The Home page features four sections, while the Pricing page lists detailed pricing information and includes a button to download the pricing page as a PDF.

React JS Projects

I have created a login/signup system using Firebase Authentication that allows users to save and display their data in the Realtime Database. Additionally, I have developed a to-do app for task management, a currency converter that uses real-time exchange rates, an add-to-cart feature for e-commerce applications, and a password generator for creating secure passwords. I have also built a reviews app for displaying customer feedback, a tabs component for organizing content, a birthday reminder for keeping track of important dates, and a UI component combining a modal with a collapsible sidebar.

Projects Link: Portfolio（/portfolio/react）

Javascript Projects

I have made a dynamic menu with filtering options to display items based on categories, developed a grocery buds app to manage and track grocery lists, and created a countdown timer to track time left until a specific date. I've also developed a Lorem Ipsum generator for placeholder content, made a tab component for switching between different content views, and created a simple calculator for arithmetic operations. Additionally, I have made a reviews carousel with navigation controls, developed a counter app that increments or decrements values, and created a color flipper app to change the background color randomly on each click.

HTML CSS Projects

I have created a fully responsive Ecommerce website using HTML and CSS for a seamless shopping experience, developed a responsive landing page with modern design elements using Bootstrap, and made a sleek, customizable landing page with optimized styling using Tailwind CSS.
